

FACT SHEET

UPDATED: 06.17.22

PROJECT STATUS

The project is currently in the design phase, which means the City is determining all the project details and specifications that will be needed to construct the project.

A Citizen Participation Program (CPP) Meeting was held on February 28, 2022 for public input for the initial design phase.

The City received 90% design plans in late April 2022.

This project will require a Coastal Development Permit from the California Coastal Commission prior to the start of construction and also a Major Use Permit from the City's Planning Commission.

Construction on this project is expected to begin in early 2023.

PROJECT BUDGET

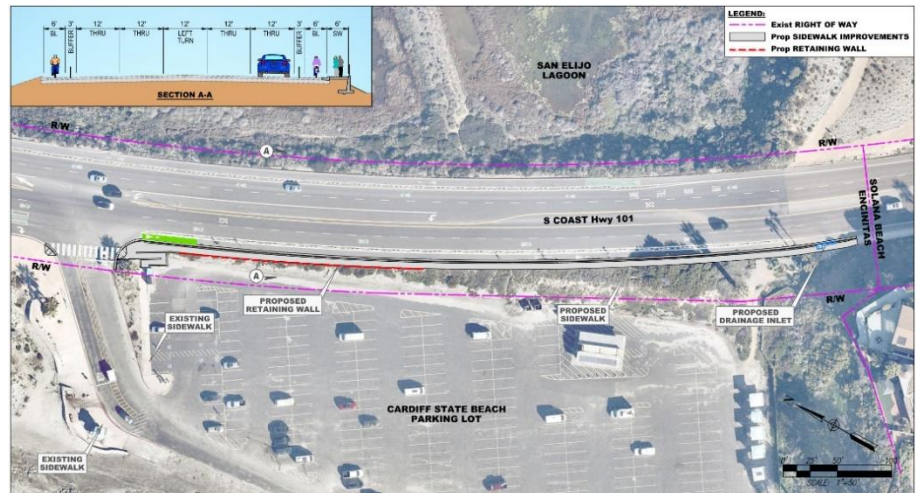

The project design and construction are largely state funded through the Highway Safety Improvement Program (HSIP). HSIP funds are allocated and distributed by Caltrans. The City is providing local funds of approximately 10% of the total project cost for design and construction.

S. Coast Highway 101 Sidewalk Improvements to Solana Beach (CS22D)

ABOUT THE PROJECT

The S. Coast Highway 101 Sidewalk Improvements to Solana Beach (CS22D) will construct a sidewalk on the west side of South Coast Highway 101 between the South Cardiff State Beach Parking Lot Entrance and the city limits with Solana Beach. Currently, a pedestrian facility does not exist along this segment. Pedestrians utilize the existing bike lane for travel.

The project scope involves installing approximately 675 linear feet of curb and sidewalk, construction of retaining walls along portions of the sidewalk, new curb ramps and crosswalk striping.

The project will maintain the current separated bike lane with the installation of the new sidewalk. The project is in alignment with the City's Active Transportation Plan.

PROJECT LOCATION AND AMENITIES

The project is located in the City of Encinitas in the Cardiff area near the southern city limit with Solana Beach.

Project benefits and amenities include:

- Creation of separate bike and pedestrian facilities along this segment.
- Providing a needed pedestrian connection with the City of Solana Beach.

What to Expect:

- **When will design be completed?**
Design is estimated to be completed late Summer 2022.
- **How long will construction take?**
Construction is estimated to take approximately 3-4 months.
- **Will construction impact access to the Cardiff State Beach Parking Lot?**
There may be impacts around the entrance to the parking lot during construction however, it is anticipated that the parking lot will remain open during construction.

REVIEW PROCESS

The project plans will be brought forward to City Council for approval and authorization to advertise for construction bids when design is completed.

This project is consistent with the City's Quality Transportation vision of the Strategic Plan by providing effective, safe, and easy transportation for all modes of movement and for all demographics. This project meets Goal 4.1 of the City's Climate Action Plan to "Reduce Vehicles Miles Traveled."
